

Urgent alert from CCoF

Hey! Have you heard that the plan to pursue Coalbed Methane Gas Extraction right on our doorstep has now gone to a Public Inquiry?

I had no idea! What does that mean for us now?

Well, in fairness, whilst it's not the best news, it's still good news for us because we get an opportunity to put our case across as local residents.

That still sounds really worrying! How are we going to get our case across as a community?

It is really worrying. But there's a group called CCoF, formed by local residents to represent local people. They have built a really strong case against CBM, based on independently researched scientific and technical evidence. They've even found a great legal team, and helped to convince both Falkirk and Stirling Councils to reject the planning application. Now they really need our help!!!!

Help with what?

Strong legal Representation, mainly – and other expenses of the Inquiry. CCoF are just residents with families and work commitments – without further funds, the group won't be able to hire the legal team necessary to put forward the community's case. You know what it's like – without cash, you can't fight the big machine!

Brilliant! How do I donate?

Donating is easy. Follow this link or visit the web page for further information:-

Thanks in advance for your support!
Season's Greetings from all of us at CCoF
